V. Liquidity information

1. Liquidity maintenance ratio

The average liquidity maintenance ratio for the year ended 31 Dec 2017 was 285.63% (the year ended 31 Dec 2016 was 100.11%). The average liquidity maintenance ratio is the simple average of each calendar month's average liquidity maintenance ratio calculated in accordance with the Banking (Liquidity) Rules (Rule 48) made by the Monetary Authority under section 97H of the Banking Ordinance.

2. Approach to liquidity risk management

Wells Fargo Bank N.A., Hong Kong Branch ("the Branch") has primary responsibility for ensuring it is able to meet all on and off-balance sheet obligations as they mature without incurring excessive cost, while continuing to fund its assets and growth therein. The Branch is required to conform to the liquidity regime prescribed by the Hong Kong Monetary Authority ("the HKMA") and to meet the HKMA's requirements. The Corporate Governance Groups has the responsibility to ensure that the liquidity risk management policies and practices of the Branch are in accordance with its globally coordinated, centralized approach to liquidity risk management.

The liquidity management policy ("the Policy") is reviewed and approved by APAC Regional Asset and Liability Committee ("APAC ALCO") and Hong Kong Branch Management and Control Committee ("HKMCC") on an annual basis. However, it is likely that the Policy will evolve on a more frequent basis as business activity changes in response to stress test outputs or a changing regulatory environment.

Prudent liquidity planning and management are crucial to maintaining a sound balance sheet and stable earnings at an acceptable level as well as withstanding the stresses resulting from an internal problem or crisis in the marketplace.

Proper liquidity management requires an organizational structure with clearly defined segregation of roles and responsibilities. Further, liquidity limits are established to ensure that the Branch maintains appropriate liquidity under both normal and stressed conditions. Liquidity risk reports including stress testing results are prepared regularly. Proper processes to report the liquidity risk reports and any issues to senior management are established.

As it is crucial to the Branch's viability to maintain appropriate liquidity, a contingency funding plan in addition to the liquidity risk reports is maintained.
