V. Liquidity information

1. Liquidity maintenance ratio

The average liquidity maintenance ratio is the simple average of each calendar month's average liquidity maintenance ratio calculated in accordance with the Banking (Liquidity) Rules (Rule 48) made by the Monetary Authority under section 97H of the Banking Ordinance.

	Quarter Ended	Quarter Ended	Six months Ended
	30 Jun 2018	31 Mar 2018	30 Jun 2017
	%	%	%
Average LMR	268.34	291.43	329.70

2. Approach to liquidity risk management

Wells Fargo Bank N.A., Hong Kong Branch ("the Branch") has primary responsibility for ensuring it is able to meet all on and off-balance sheet obligations as they mature without incurring excessive cost, while continuing to fund its assets and growth therein. The Branch is required to conform to the liquidity regime prescribed by the Hong Kong Monetary Authority ("the HKMA") and to meet the HKMA's requirements. The Corporate Governance Groups have the responsibility to ensure that the liquidity risk management policies and practices of the Branch are in accordance with its globally coordinated, centralized approach to liquidity risk management.

The liquidity management policy ("the Policy") is reviewed and approved by the APAC Regional Asset and Liability Committee ("APAC ALCO") and Hong Kong Branch Management and Control Committee ("HKMCC") on an annual basis. However, it is likely that the Policy will evolve on a more frequent basis as business activity changes in response to stress test outputs or a changing regulatory environment.

Proper liquidity management requires an organizational structure with clearly defined segregation of roles and responsibilities. The Multi-Currency Treasury group in APAC ("MCT APAC") formulates the funding strategy, manages the liquidity and funding needs, and the mismatched FX exposure of the banking book of Hong Kong Branch. The APAC ALCO, HKMCC and Independent Risk Management provide oversight and effective challenge of MCT's liquidity risk management strategies and assumptions. MCT APAC reports liquidity strategies, issues and risks to the APAC ALCO and HKMCC in their regular meetings.

Liquidity limits are established to ensure that the Branch maintains appropriate liquidity under both normal and stressed conditions. Liquidity risk reports on the liquidity maintenance ratio ("LMR") and the cash balance projection are produced daily. The monthly liquidity stress testing is to measure the LMR and the minimum cash balance within

Hong Kong Branch

3 months under idiosyncratic, market-wide and combined stress scenarios. The stress testing results are reported to APAC ALCO and HKMCC. Proper escalation and notification processes to report breaches of any liquidity limits to HK Branch Crisis Management Team, APAC ALCO and HKMCC are established. MCT APAC is required to take immediate corrective action. As it is crucial to the Branch's viability to maintain appropriate liquidity, a contingency funding plan ("CFP") is in place to address liquidity needs under a market-wide, idiosyncratic and/or a combination stress event. The CFP includes procedures for monitoring emerging liquidity events, a governance framework and management process, and potential mitigating actions which the Branch could undertake.

WFBNA HK has two sources of liquidity to meet its funding. The primary source is intra-group funding from Head Office. WFBNA HK also sources liquidity directly from clients who have a need to place their cash with a secure financial institution. These client deposits are a useful source of liquidity and a tool by which the Bank can effectively manage currency balances. Furthermore, this activity serves as an advance warning indicator as to the health of both the wholesale money market and of the Bank's standing and perceived financial strength from time to time.
